INTRODUCTION

Inventechs Technology is a specialized engineering company that provides engineering services and distributes high-tech electronic and electrical components. The company has established itself as a trusted partner in the region, strategically focusing on the Aerospace and Defense, EV / Automotive, Renewable Energy, and General Industrial sectors. As the official business partner and authorized distributor for Sensata Technologies and Rogers Corporation across GCC countries and the MENA region, Inventechs delivers cutting-edge technological solutions to meet diverse industry requirements.

Besides the supplying and distributing activities, INVENTECHS provides technical consultancy services that can help and guide the customers to decide and choose suitable products and help to solve the technical problems that might happen.

At the same time, INVENTECHS is dedicated to working side-by-side with its end-users to deliver the optimum, cost-effective, alternative solutions and services, and offers comprehensive risk analysis to help OEMs optimize the supply chain, taking into consideration the future business goals and objectives.

INVENTECHES Technology will continue to grow and focus on providing the most specific and unique electrical and electronic components, and integrated solutions accomplished through our

VISION

The global leader in advanced Sensing and Rotary Electrical Transmission Technologies, pioneering solutions for Electric Vehicles & Automotive, Aerospace & defense, Renewable Energy, and Industrial Applications.

MISSION

Shaping the industry's future by delivering unprecedented value through high-performance technology and innovative engineering solutions. We are committed to powering our customers' success, through infrastructure and industrial advancement.
